Biological Materials Production Manager

TechLab, Inc. develops, manufactures and distributes medical diagnostic tests. This company places emphasis on science and collaboration with Universities. We are looking to add a **Biological Materials Production Manager** to our team.

An employee in this position can expect to perform the following duties:

- Oversee the production of critical raw materials used to manufacture products including antibodies and antigen
- Develop and transfer new production processes
- Troubleshoot existing production and scientific processes
- Look for patterns of problems occurring in kits and determine ways to fix issues
- Assign projects and schedule daily work for BMP employees and ensure deadlines are met
- Chair BMP department meetings
- Write and review Standard Operating Procedures and Master Batch Records to ensure they are compliant with all requirements
- Supervise employees and monitor daily activities
- Document departmental training
- Work with Quality Assurance to complete defect, non-conformances, as well as corrective and preventative action reports
- Recommend, and interview potential employees

TechLab offers a competitive salary with excellent benefits. This position requires candidates to possess an Master's degree in a scientific field with 3 years of supervisory experience.

Interested candidates should send a resume to **careers@techlab.com**
